CARRER OBJECTIVES

Enthusiastic full-stack developer with a comprehensive understanding of both front-end technologies (HTML, CSS, JavaScript) and back-end programming (C, C++). I am eager to apply my knowledge in a real-world setting, collaborate with a talented team, and contribute to the creation of innovative and scalable web applications.

SKILLS

- JAVA
- C & C++
- SPRING BOOT
- MYSQL
- HTML & CSS
- JavaScript

EDUCATION

B.E COMPUTER SCIENCE ENGINEERING

2022-2025

P.S.R Engineering College

CGPA - 7.4

DEEE -ELECTRICAL AND ELECTONICS ENGINEERING

2019-2022

S.Thangapazham Polytechnic College

Percentage- 89%

SSLC

2018-2019

Joy Mat.Hr.Sec.School

Percentage- 79%

CERTIFICATION

- Certificaton for Cloud Computing and getting started with AWS - 2023
- Successfully Completed the Workshop on the Kit-Investigated IOT Training Arduino - 2023

LANGUAGES

- English
- Tamil

PROJECTS

DEEP LEARNING

NOV-2024

Plant Disease Detection Using Deep Learning

- The Plant Disease Detection project aims to simplify plant disease identification through a user-friendly platform.
- Developed with YOLO (You Only Look Once) and Deep Learning.
- Key features include real-time disease detection, a mobile application for field use, offline functionality for remote areas, continuous learning for emerging diseases, and high-precision classification.
- This project highlights my ability to create efficient, scalable, and AI-powered applications that enhance agricultural productivity and food security

MACHINE LEARNING

APR-2024

ANPR -Automatic Number Plate Recongition

- The system designed for identifying and recording vehicle license plates. The project aims to develop a robust ANPR system capable of accurately capturing license plate information from images or video streams
- The system will be integrated with databases for vehicle registration information retrieval, enabling applications in law enforcement, parking management, and traffic monitoring
- The project's success hinges on the optimization of algorithms for real-time performance, accuracy, and scalability across various environmental conditions and vehicle types

WEBSITE

JAN-2024

Course Enrollment Management System

- Developed a comprehensive Course Enrollment Management System using React, enabling seamless management of student enrollments, course assignments, and administrative tasks.
- Implemented features such as user authentication, dynamic form handling, and real-time data updates.
- Ensured optimal performance and user experience by leveraging modern React tools and best practices.

INTERNSHIPS

Cybersecurity Intern - Vetri Technology Solutions

June - 2024
